VersaCAD in Schools

“You still have a wonderful product!”

— Cherry Creek Middle School

This is just one of many schools who continue to use VersaCAD for Mac for the education of their students, especially at the junior high and high school level.

This product is an easy to learn, easy to use, introduction into the CAD world for students. With the resurgence of the use of Mac in schools, VersaCAD Mac remains the perfect fit for those wanting a great

introduction to 2D CAD.

VersaCAD’s easy interface allows students of all ages to learn how to design and draw in a CAD program. It is a great basis for going on to learn more complex CAD programs or design programs for 3D designing. It is especially good for junior high or high school students because of their limited knowledge about drafting.

It allows these students to learn computer aided drafting alongside their regular drafting course in order to better prepare them for the technology that is used in their future career.

For more information, check out this [site](#).

REPORT

VersaCAD’s New Release

VersaCAD 2010 Windows release is now out! Sporting a great picture of Mike’s grandson, Zeke, the new CD is now being sent out!

The new version includes three main updates: a spell checker, opening and saving of .2dx files is much faster, and translation to and from DWG 2010 files.

The spell checker is incorporated in Add/Text, Modify/Text/Edit, Modify/Text/Spell. It also works in VersaCAD Explorer, which gives you the ability to spell check the entire drawing. An English dictionary is included, but dictionaries can be easily customized.

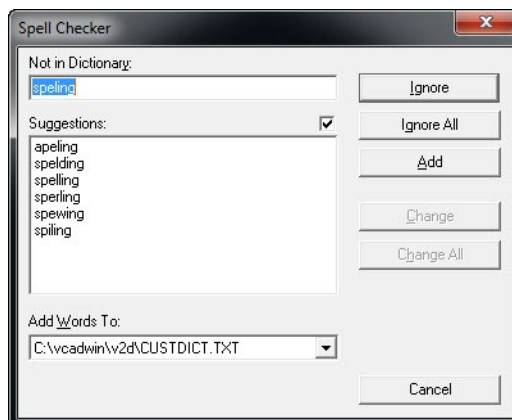

Also, VersaCAD 2010 now

handles the opening and saving of .2dx files much faster. Save is as much as two times as fast and Open as much as five times as fast. For VersaCAD users who are using versions earlier than 2008, the .2dx file is a compressed XML file that allows much larger object counts. Files with 500,000 to 1 million objects is possible.

The last updated feature is the translator. The translator that comes with VersaCAD 2010 now includes the translation to and from DWG 2010 files.

These new features are sure to make your design process simpler. Also look for the VersaCAD 2011 release coming up around the end of the year for even more updated features, including image file uploading.

If your Premium Service has expired, now is a good time to get it renewed. This a great new version of VersaCAD, and you don’t want to miss out on any of the new features. Call or email Archway today for your quote.

VersaCAD in Rural Builder Magazine

Check out the update-article on CAD in the May issue of *Rural Builder*. In it there is a list of the available, time and money saving CADs on the market today.

Oliver Witte, the author of the article, writes “Versacad, of Huntington Beach, Calif., like Datacad, also competes directly with Autocad, but for a total cost — \$800 — that isn’t much more than some vendor’s introductory prices or ‘light’ versions. Also like Datacad, Versacad has earned its durability by taking care of its customers. See www.versacad.com.”

VersaCAD is continually bringing a great product to the table and it is evidenced by the reviews received in articles such as this.

Check out the rest of the article too for some great information on the CAD market right now.

Who’s Who at Archway Systems

Tom Lazear	Administration, Sales & Training
George McMeans	Sales & Training in Nor. Cal.
Mike Lazear	Programming & Support
Phill Frye	Training & Consulting
Greg Hamano	Training & Support
Sandy Lazear	Accounting
Linda Grubb	Support and administration
Josh Lazear	Webmaster , Z Support and Programming
Daniel Lazear	Programming
Stephen Peters	Application Engineer
Chris Grubb	Civil Engineering Software
Lauren Jansen	Marketing & Sales
Shannon Lazear	Marketing

Archway’s Product Line

Archway is a full service provider of technical software serving the Academic, Architectural, Civil and Mechanical Engineering markets.

DESIGN & ENGINEERING SOFTWARE:

- MicroStation, ProjectWise and applications
- VersaCAD Win & Mac
- Bentley Architecture & Generative Components
- InRoads, PowerCivil & Geopak Civil Software
- Haestad Hydraulic Analysis Software
- Hevacomp & Tas Software
- Solid Edge and applications
- Promis*e

3D GRAPHICS & ANIMATION SOFTWARE:

- Rhino 3D, Flamingo, Penguin & Bongo
- Bentley ProjectWise Navigator
- ArchVision libraries

COMPUTER PERIPHERALS:

- Z Corp 3D Printers

SERVICES:

- Training
- Phone support
- On-site support
- 3D Printing
- Customizing
- Consulting
- Contract software development
- CAD file translation

ZPrinters

Just like new Z 450 at half the price! Archway turns our demo machine at least once a year, and it is time for our demo 450 to go. If you purchase our printer and put it under warranty, it is just like a new printer. There is no difference. A used printer under warranty is the same to you as a new printer under warranty, only you save \$20,000. Two parties have already expressed interest. If you are looking for a printer, don’t wait! First come, first served.

Latest Design?

Send us your latest VersaCAD design. It might be featured in the next VersaCAD Newsletter!
