

VERSACAD COMPUTER-AIDED DESIGN SOFTWARE CUSTOMER COMMENTS

With its excellent customer service and affordable pricing structure to support an easy-to-use and versatile product, it is no wonder that Archway Systems constantly receives accolades from its customers. Here are just some of the comments Archway Systems has received regarding its VersaCAD products:

"VersaCAD Mac is the best CAD software ever on any platform. Thank you to all of you for the monumentous work on the OS X version of VersaCAD. Yes, 2005 will be a grand new chapter in the life of this elegant and wonderful product!"

Jon Moffatt, Engineer (retired)
Otis Elevator

"Thank you; thank you; thank you for developing VersaCAD-Mac for OSX. I'm anxious to use it."

Darrel Hoelscher, ceo
Hoelscher, Inc.

"I have been using VersaCAD Mac since 1988, and have always been happy with it. I design supermarkets, C-Stores and all our tradeshows. I have always been satisfied with the way VersaCAD has performed."

G. Griesbaum, Manager
JR Hussman & Co.

"We have used VersaCAD for nearly twenty years, for all our designs. VersaCAD played a major role in the development of the Smartwheels ideas, the generation of prototypes and the finalized award-winning design. VersaCAD's a winner in its own right."

Robert Brandiff, President
Concept Sports, LLC

"I have been a loyal and very satisfied VersaCAD user since 1994. VersaCAD is the only software that I could come close to saying is perfect. I have not had a single problem. Most of all it is designed for logical thinking people and has none of the nerd baggage that so much software has."

Tim Barnett, President
Barnett Offshore Design Ltd.

"All of my employees were AutoCAD trained. They wanted to switch to VersaCAD after they realized how much easier it was. We are very pleased with the new efficiency. No one wants to use AutoCAD anymore. I'm amazed how many architects think we use VersaCAD merely because it's cheaper! If they only knew."

Gayle Berkey, President
Gayle Berkey Architects

"VersaCAD is the most user friendly and simplest to learn and use of all the CAD software I have tried, including AutoCAD, DataCad, Chief Architect, ProDesktop, and CadKey. Keep up the good work."

John McConnell, CAD Instructor
Walkkill Valley Reg. High School

“I wonder when the people spending all the big bucks on AutoCAD will finally realize that VersaCAD fits their needs at 5% of their current CADD expenses.”

Paul Zeman, President
CADD Value, Inc.

“I start all my students on VersaCAD then later introduce AutoCAD. Most migrate back to VersaCAD for their projects.”

Gary Salazar, CAD Instructor
Westlake High School

“I have been using your product for the past 15 years and have been turning out work as if I had 10 people instead of just one producing all these construction documents”

Ivan Blitz, President
Blitz Architectural Group

“I’ve been using VersaCAD since 1987. I started on version 5.0. I’ve used it exclusively since that time. I’ve used VersaCAD in the nuclear industry in Canada. Now I’m in the automotive business in Great Britain, and I still rely on VersaCAD.”

Mark Sowerbutts, Engineer
Independent Consultant

“VersaCAD does everything we need in designing pipe organs; it is intuitive, very easy to learn and easy to use. We were even able to share our files for the City of Toyota’s organ with a production shop in northwest Germany that assisted us. All the design files transferred seamlessly. I highly recommend VersaCAD.”

John Brombaugh, President
Brombaugh & Associates, Inc.

“I’ve been using VersaCAD since 1984 for design of neurosurgical instruments. I wouldn’t use anything else.”

Trent Wells, President
Trentwells Company

“I have designed, drawn, and plotted a complete macadamia nut processing plant with VersaCAD Mac.”

Alan Mefford, Engineer
Independent Consultant

“I do custom homes in Oregon and find VersaCAD to be the fastest CAD I have ever seen for producing working drawings.”

Garry Henderson, Designer
BIG Custom Enterprises

“Bless you. This new VersaCAD fulfills my entire wish list. One day soon, AutoCAD will no longer be the so called standard among Architects.”

Joel Schultz, AIA
Architect
