New VersaCAD Website

VersaCAD.com has an all new look! Check it out and see some amazing user submitted projects! Users are still up and running with VersaCAD and it is as fast and easy as ever. It is compatible with Windows XP, 7, 8, 8.1, and 10! You can use old small PCs with XP all the way up to brand new Windows 10 with 30" dual monitors!

Do you have any projects that you want to submit? Email them to tom@archwaysystems.com and we will try to get them up on the website. Thank you to all who have submitted projects so far. We are grateful for your business and love to see your projects!

Recent Notable Projects

We recently sent out an email request to VersaCAD users to see if they would have some drawings we could use for the VersaCAD website and were overwhelmed with the response. Literally hundreds of drawings were submitted for very interesting projects. We've included here a small sampling. To see more visit our newly redesigned website.

Robert Arrendale submitted just about the entire drawing set for Creekside Health and Rehabilitation Center in Indianapolis, Indiana, a project which just recently completed. Here are a couple of images. Another submitted project was from Rob Stevenson, president of Plotz 'n' Plans in Australia, who uses VersaCAD for all disciplines, including mechanical design of this module. One example of his work is seen on page 2.
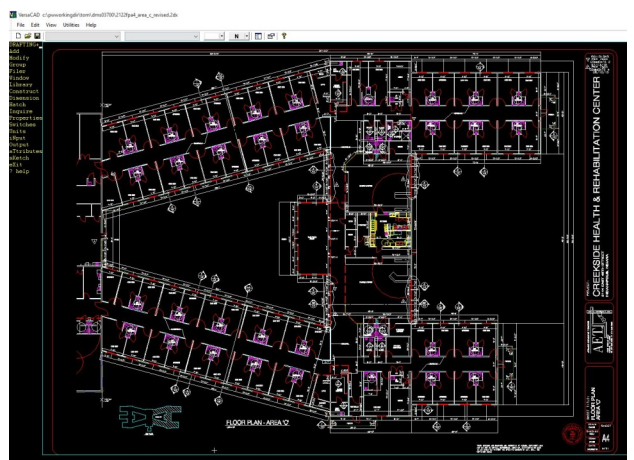

When surveyed, all the users say the reasons they stick with VersaCAD are:

1. Get the work done quicker
2. No fuss about licensing
3. New employees come up the curve very quickly
4. Typically users do more than just

draw, so they appreciate how they can come back to VersaCAD and not be burdened with extraneous functions

5. Doesn't cost an arm and a leg. VersaCAD continues to add functionality on an as-needed basis. That is, a person can use the latest software just as they always have. No need to learn new functions unless they are needed. Additionally, VersaCAD doesn't slow down as it gains more and more functionality. In fact, VersaCAD 2015 is the fastest version ever. Double click a file and VersaCAD is open within less than 2 seconds (try that with any other CAD software). Also, with VersaCAD's small footprint, it runs fine on any Windows device, even back to older versions of Windows. Try it on the Surface Pro or the newer Dell or HP Windows tablets and laptops. With VersaCAD's economical corporate site license fees, license worries become a thing of the past as the software can then be installed on any computer owned by the company, from big desktops down to smallest Windows

tablets.

If you are tired of spending too much time managing your CAD software and not enough time getting work done. If you are tired of paying through the nose for your CAD tool. If you are missing

deadlines for drafting or tired of wading through bloated menus and ribbon bars and tasks and modes, then you really owe it to yourself to give VersaCAD a hard look. Versatile Computer Aided Design. A classic.

Archway's Product Line

Archway is a full service provider of technical software serving the Academic, Architectural, Civil and Mechanical Engineering markets.

Design & Engineering Software:

- VersaCAD Windows
- MicroStation, ProjectWise and applications
- Bentley Architectural & Civil Software

Services:

- Training
- Phone support
- On-site support
- Customizing
- Consulting
- Contract software development
- CAD file translation
